

toilet, tile &  
bath cleaner

1 quart commercial  
toilet, tile & bath cleaner concentrate

**safe, green clean**

-  Comparative Cost: All products priced at costs competitive to the cleaners you already use
-  High Efficacy: Proprietary technology allow for products to maintain high efficacy
-  Environmental: We incorporate the same enzymes found within most living organisms
-  Truly Clean: Our products do not leave behind a lingering chemical residue

# 1 quart commercial toilet, tile & bath cleaner concentrate

## Technical Specifications

Weight Gallon	2.08 lbs per Quart Container	
Odor	Mild Natural Scent	
PH Range	2.0 to 3.0	
Specific Gravity	Typically 1.01	
Shelf Life	Minimum 24 months in original container	
Storage	Protect against freezing and avoid storing in areas that exceed 180 degrees F	
Application Rates	<b>By the Quart: Standard Usage:</b> 1 ounces per Quart <b>Heavy Usage:</b> 2 ounces per Quart <b>By the Gallon: Standard Usage:</b> 4 ounces per gallon of cold water <b>Heavy Usage:</b> 8 ounces per gallon of cold water	
Appearance	Light Purple Liquid	
Attributes	Readily Biodegradable Non-Corrosive No hazardous Chemicals No Ozone depleting substances Safe in Septic Systems	No abrasives No harsh solvents Non-Combustible Non-Flammable Damage Free Cleaning
Applications	Removes dirt build-up on grout, organic matter on Toilets, Shower stalls, bath tubs and heavy soiling from hard surfaces and other non-porous surfaces	
First Aid/Caution	Cleaner is safe, ph Neutral and will generally be safe to use when used in accordance with the recommended instructions. Always keep cleaning products away from children. If swallowed, drink cool water and call a physician. In case of eye contact, wash with cold water for 15 minutes.	
Shipping Information	<b>Pallet Grid 6 Rows of 7 = 42 cases, 5 Layers High</b> <b>Cases per Pallet:</b> 210 <b>Case Weight:</b> 10 lb <b>Case Dimensions:</b> 6.5" x 6.5" x 10" <b>Case Cube:</b> .245 <b>Pallet Dimensions:</b> 48"x40"x57" <b>Pallet Weight:</b> 2200 lbs

## Clean Up

wg™ Commercial products are different from the cleaning products you know. Instead of scrubbing, you just spray and wait about one minute. That's because these products don't immediately "kill" what you spray, but instead "break down" your dirt, stains and spills into harmless waste that you can easily wipe away. That means no lingering chemical residue, like what can be left behind and build up when you clean with traditional, chemical-based cleaners. With the all-inclusive range of wg™ Commercial cleaning products, your organization can green your entire business overnight. And at a cost that's comparable to what you already spend on chemical cleaning.

## Science behind the ingredients

### WHAT ARE ENZYMES?

- Enzymes are naturally occurring molecules that work as catalysts to break down organic material. They exist in living organisms to instigate important functions, like digestion in humans.

### WHAT TYPES OF ENZYMES ARE USED IN wg™ COMMERCIAL PRODUCTS?

- There are many different types of enzymes that exist in nature, but the primary enzymes in the wg™ Commercial proprietary blend are Protease, Amylase, Cellulase and Lipase. They are combined with other enzymes in varying degrees to create each specific cleaner in the wg™ Commercial product line.

### HOW DO THEY WORK?

- When you apply wg™ Commercial products to a targeted stain or area to be cleaned, surfactants (small amounts of added soaps) gently lift the stain from the surface to allow the enzyme formula to surround the dirt and break it down. This breaking down process takes time to work. Just spray the targeted area, wait about a minute and then wipe or scrub away.

### WHY ARE THERE DIFFERENT wg™ COMMERCIAL PRODUCTS?

- Different organic material may exist in various areas of your business. For example, the type of scum that you clean in your bathroom may not be composed of the same matter as the dirt you clean off your floors. Therefore, each wg™ Commercial product is specifically formulated with a unique enzyme ratio to clean each area of your business as effectively as possible.

### "GREEN" CLEANERS?

- Other green cleaners include ingredients like citrus juices, vinegar, baking soda or other natural products, but they are very low in terms of efficacy. Also, wg™ Commercial products are enzyme-based and an alternative to traditional chemical cleaners

### ARE ENZYME CLEANERS REALLY AS EFFECTIVE AS "REGULAR" CLEANERS?

- Enzyme cleaners are MORE effective than other cleaners. Chemical-based cleaning products attack dirt with power and require caustic scrubbing to remove stains. Cleaning with these products not only requires hours of labor, but it can also damage the surface to be cleaned. Since each wg™ Commercial product is uniquely formulated to lift and loosen a specific type of stain, they are more effective at removing the stain permanently.

### WHY DID IT TAKE SO LONG FOR ENZYME CLEANERS TO COME TO MARKET?

- In actuality, some enzyme cleaners already exist, however, most of them are chemical-based cleaners that feature ONE enzyme as an added ingredient. This is because enzymes are inherently cannibalistic—when they are combined, they tend to destroy each other. The developers of wg™ Commercial products have unlocked the secret to combining enzymes, which allows them to work together to break down organic matter, naturally and effectively.

The only special consideration in terms of storage is that enzymes cannot tolerate temperatures over 180 degrees Fahrenheit. Since this temperature is unlikely to be achieved in a dishwasher or washing machine, it is safe to say that there is no special care for wg™ Commercial products.

# Green Cleaning Products LLC

*Freeing the World of Toxic Chemicals ...one Building at a Time!*

[Green Cleaning Products LLC](#) was established with the mission of “Freeing the world of toxic chemicals, one building at a time!” Our products are non-toxic, have zero impact on the environment, and are safe for you, your employees, and your stakeholders. Through a partnership with the US EPA many of our products are certified under the [Design for the Environment \(DfE\)](#) program and are recognized for its safer chemistry. Green Cleaning Products LLC is helping you improve the indoor air quality of your building(s) to make a positive difference via the wowgreen™ product line of green janitorial chemicals.

At Green Cleaning Products LLC we believe in a better way. You and your business will benefit by transferring what you spend on traditional chemical cleaning to a safe, green cleaning method for your building(s). We know a brighter future is possible through better, safer, more sustainable and greener products.

Our goal is to deliver on the green and sustainability promise in **all** aspects of our operations. wg™ Commercial was created specifically for the commercial marketplace. There is no eco-premium as our products are comparable in price to traditional synthetic chemical based products!

wg™ Commercial cleaning products are non-toxic, safe, effective, and all-natural enzyme cleaners. Each cleaner contains a unique enzyme formulation designed for its specific task. Our manufacturing, packaging, and shipping are models of sustainability and reduced carbon footprints.

Our goal is to bring to you higher performance cleaning products with environmental responsibility. Our products contain no volatile organic compounds (VOCs), no phosphates, and no synthetic fragrances. We provide high efficacy products at a very competitive cost for a safe, green, clean.

There is no better time to make the change to cost efficient wg™ Commercial cleaning products. These will assist you to be more environmentally friendly - for the health of your team and in preserving our planet for generations to come.

We are excited to work with your business and help it become more sustainable.
